2011. 11 Rev.2

NEW criterion of Big Forklift Truck

Hyundai introduces a new line of 7E-series diesel forklift trucks. Excellent power and performance makes your business more profitable.

Excellent

Cruise Control

Instrument Switch Panel

Air Conditioner & Heater

Rear View Camera

Rear View Monitor

ESL(Engine Start Limit)

■ Some of the photos may include optional equipment.

Ability of best, the new master on the job-site!

Smooth running, efficient and ergonomically designed, 110D/130D/140D/160D-7E series are made to meet your needs.

162HP/2,200rpm
74.6kgf-m/1,400rpm

Powerful Engine Cuijins QSB6.7 Engine

The six cylinders turbo-charged engine is built for power, reliability and economy. This engine meets EPA Tier 3 and EU stage IIIA emission regulation.

Engine Control Mode
According to operating load, the operator can select engine mode by changing side panel switch.
STD Mode : Fuel reduction mode for light-duty operating load
POWER Mode : Heavy-duty or operating at slope

Adjustable Engine Low Idle RPM
While engine runs, low idle rpm can be increased by unit of 25rpm and it keeps previously set rpm when engine restarts.

Full-automatic Transmission

Full-automatic transmission gives easy, convenient handling and soft, smooth shifting. The operator can select two kinds of automatic modes.
(1st→3rd, 2nd→3rd)

Cruise Control
It offers the ability to automatically maintain a desired engine speed with no accelerator pedal input and reduce fuel consumption.

Transmission Control Switch

Excellent Night Work
- Variety position of work lamp provides the operator more comfortable and safe operating environments.
- Front : fender(2), mast(2) - Rear : cab(2)

High Power
Low Noise

■ Some of the photos may include optional equipment.

Faster Travel Speed & Better Gradability

The powerful high-output engine provides greater acceleration, better gradability and faster travel speed on any tough terrains or slopes.

Gradability(Loaded)
110D-7E : 45.4 % 140D-7E : 37.0%
130D-7E : 41.0% 160D-7E : 31.4%

Travel Speed(Unloaded)
110D-7E : 20.96mph
130D-7E : 20.56mph
140D-7E : 20.00mph
160D-7E : 20.00mph

Increased Mast Tilting Angle
Utilizing the mast tilting angle of 15 degrees forward and 12 degrees backward, the operator can perform loading and unloading jobs safely and rapidly.

Ergonomic driving space design!

A design based on human engineering relieves fatigue and increases operator's efficiency.

Operator Friendly Gauges and Water-resistant Monitor Panel

Easily Adjustable Suspension Seat
An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability. (Head Rest - option)

High-output Air Conditioner & Heater
An air conditioner with integrated the condenser is mounted on upper side of the cabin to make a wide room in the cabin. And an air conditioner with high-output and heater always provide you comfortable environment when you work.

■ Some of the photos may include optional equipment.

ESL(Engine Start Limit) / Rear View Camera Monitor
Engine starting is possible after password verifying, when password is not correct, intercepts the fuel injection of engine. Whether to use ESL can be selected from the menu of the monitor. The rear view camera makes the operation more easy and convenient. And it supports 4 camera channels.

Centralized Instrument Switch Panel

USB MP3 Player & Remote Control

Hands Free Socket

Quick Response of Operating Control Levers
Only minimal operator's effort is required for precise, safe and productive control. (3-Lever : standard / 4·5-Lever : option)

Ergonomically Positioned Pedals
Based on human engineering ; the accelerator, brake and inching pedals are optimally positioned for the operator's convenience.

Adjustable Steering Column

Steering handle is adjustable depending on the operator's body shape. Adjustability of steering column makes you more comfortable.

Danger-free through high durability!

Safety and durability are priorities in design of the equipment.

Up-to-date Cooling System

The minimum fuel consumption and low noise are available by applying hydraulic cooling fan sensing intake air temperature, transmission oil temperature, coolant temperature and hydraulic temperature.

OPSS(Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operators is not in the normal position.

Durable Drive Axle

The hypoid type planetary reduction drive axle smoothly delivers desired torque to the drive wheels.

Auto Parking

The parking brake is engaged automatically when the transmission is neutral and the operator leaves the seat.

Some of the photos may include optional equipment.

Wet Disc Brake System

The wet disc brake system is virtually maintenance free and is enclosed to protect from dust and water.

Fitted Protector for Hub Bolts

Durability has improved by applying protector for preventing bolts breakage. (Easy parts supply due to the wheel in coinon with front wheel)

Cylinder Guard

This guard helps to prevent possible damage from any foreign material.

Grease Fittings

Grease fittings are installed for fast access to steering axle center pin when doing your service checks.

Highly Durable Mast & Carriage Side Roller

Side roller with great durability for mast and carriage is included.

Highly Durable Carriage

The carriage is very strong cause of applying the high tensile structural steel which has a excellent durability. Work at the narrow space is easy because the width of carriage is narrower then overall width of the vehicle.

Large Footboard & Handle

Wide "open" step offers convenience and safety when entering and exiting the truck.

Centralized design for easy service!

An ideal arrangement of component parts ensures easy access and convenience for maintenance.

Large Engine Hood
Highly accessible engine compartment assures fast and efficient maintenance.

Easy Change Air Cleaner
This air filter is readily accessible for cleaning or replacement.

Cabin Air Fresh Filter
The internal pressure is maintained to be slightly higher than that of outside to exclude dust and to reduce noise levels.

Cabin Tilting Automatic System
Cabin tilting automatic system makes servicing of all power train components quick and easy. An electrically assisted hydraulic actuated cylinder tilts operator cabin to left side about 65 degrees for easy access to inside of truck components.

■Some of the photos may include optional equipment.

Compact fuse Box for Easy Inspection

Mechanic Friendly Fuel Filter Replacement
Highly accessible engine compartment allows for quick replacement of filters.

Electrically Monitored Air Filter
Air cleaner sensor alerts the operator of a clogged air filter and allows replacement before damage.

Automatic Self Locking Gas Spring
Engine compartment hood is safely opened by a self locking gas spring.

Master Switch
A master switch disconnects the battery power to protect the electrical system from excess electrical drainage.

Large Tool Box

Pressure Gauge Port

Easy Maintenance Oil Check
