The Rated Total Load is based on the actual working radius including boom deflection. Due to wire rope strength and other limitations, when using two part or single part hooks use the appropriate four part Rated Total Load Chart but with maximum load of:

Two Part - 3,260 lb Single Part - 1,650 lb.

The Rated Total Load Chart is supplied for reference only. Operator and all personnel must refer to the actual crane Rated Total Load Chart to determine allowable machine lifting and operating procedures. We are constantly improving our products and reserve the right to change design and specifications at any time.
